EXPRESS PRINTING COMPANY, NEWARK, OHIO

H. A. ALBYN NURSERY

We have a collection of shrubs, evergreens and perennial plants equal to most of the large nurseries. We have tried to make a collection of all nursery stock suited to our locality and believe if you consider quality that you can not do better, as we dig our stock fresh and deliver to you for planting the same day it is taken from the ground, you save packing, express and get a plant with a great deal more vitality.

In case of large plantings we will furnish plans and do your planting at the price quoted in this catalog and guarantee all stock to be planted in good live condition.

We will do your grading, draining, build walks and roads.

We have had considerable experience in Bent grass lawns and will be glad to quote you on a completed lawn, of any kind of grass.

Landscape Service

We are prepared to execute plans for any kind of a landscape, project, large or small and will furnish a free plan for the planting of any public school ground within the county.

We can furnish the stock and plant your orchard with a guarantee of a perfect stand at the end of the first year, and at a price very little greater than that usually paid for the stock alone.

Do not fail to try the new red leaved Barberry, as ornamental as the Japanese Maple:—

One year plants.....	\$.75
Two year plants.....	1.00
Three year plants.....	1.50

If any nursery stock, etc., proves untrue to description under which it is sold, we hold ourselves in readiness, on proper proof, to replace all such nursery stock, etc., that may prove otherwise, or refund the amount paid, but we shall in no case be liable for any sum greater than the amount originally received for such nursery stock.

SHRUBS

- ALTHEA**, 2 to 3 ft.—50c. 3 to 4 ft.—75c.
 Double, red, pink and white bush type.

STEPHANANDRA, flexuosa

Cut leaf Stephanandra, fine lacy foliage, 2 to 3 ft.—75c.

SYMPHORICARPUS, 2 to 3 ft.—50c.

Racemosus, snowberry, one of the best shady place plants.

Vulgaris, Coral berry or Indian currant.

RHODODENDRONS

One of the best and most beautiful broadleaved evergreens. We will have a car of these every spring and are prepared to furnish you stock much

cheaper than stock that has to come in by express and be packed. We acidify your soil and prepare it in such shape that their growth and success is assured. The two varieties we recommend are the Maximum light pink, July and Catawbense reddish purple, late May. We do not use any of the Southern varieties but all Northern grown plants. We can furnish named hybrids of various colors upon order. This type is still very scarce and rather expensive.

TAMARIX, blue green foliage, pink flowers in August. 2 to 3 ft.—75c. 3 to 4 ft.—\$1.00.

THORN flowering, Paul's scarlet, 5 to 6 ft.—\$3.00.

108	Stella, Single, violet veined white	.50
111	Tori-Odori, (dancing tiger) purple specked and splashed gray.....	.50
117	William Tell.....	.50

There are very few "do's" and "don'ts" in Iris culture. Plant very shallow, about 1 foot apart. They prefer plenty of sunlight, but will do well in partial shade. Do not use any fertilizers or manures. Any kind of good garden soil is suitable,

with sandy soil least desirable. They can be transplanted at any time, but this is usually done soon after blooming. We have good success during any summer month. When planting cover the rhigomes very lightly, not over one inch. If they appear dry and withered, they will grow, but given very little water until growth begins, do not over water, they will not stand much watering even when growing vigorously.

The tuberous rooted varieties should be planted about five inches deep in well drained soil.

EVERGREENS

The Evergreen is the one tree that nature has given man to typify eternal promise—the promise that spring shall always come again.

As Mr. Hill, the evergreen specialist says: “An Evergreen is like an old friend—the stress of years—the strife of a lifetime only makes richer his noble character. So is a home surrounded by many evergreens like a man surrounded by many friends.

There is a great difference in evergreens. There are varieties that are raised from seed very easily and grow fast, while other rare varieties as Koster Blue Spruce must be grafted and requires ten to a dozen years to make a salable tree. This difference alone stands for a great difference in price. The prices in this catalog are for trees balled and burlaped and where convenient we will set same.

ABIES CONCOLOR FIR, 2½ ft.,—\$7.50
